Shown with USB stick (not included)

CDJ-900
Tabletop Multi Player

FEATURES

1 Prepared For Any Performance

Adapting to today's variety of media formats, the CDJ-900 enables playback of MP3, AAC, WAV and AIFF audio files from CDs and USB memory devices. A USB port located on top of the turntable enables users to quickly connect an external storage device such as a Tonium Pacemaker™ or a hard drive packed with music files, minimizing the need to bring laptop computer to performances.

The CDJ-900 turntable includes rekordbox™, Pioneer's proprietary music management software that organizes and catalogs a DJ's entire music library. When music files are imported to rekordbox, the software analyzes each file and prepares them for use specifically with the CDJ turntable.

Included Music Management Software — rekordbox — Manages music files and supports and easy DJ life.

2 Pro DJ Link

Pioneer's Pro DJ Link enables up to four CDJ-2000/900s to be connected via the Link Port to share a single music source, whether it is a hard drive, USB and/or SD memory card. Once linked, users have the ability to quickly find, display and choose the music file from a connected source through the CDJ's built-in display and control knobs. A quick turn of the knob lets users scroll through created files and folders and a push of the knob confirms the song choice.

3 Advanced Auto Beat Loop

The CDJ-900 generates an auto beat loop by pressing the 1,2,4, or 8 buttons. Creating perfect loops that allow DJ's more time to blend in transitioning music. The CDJ-900 has 10 beat loop options providing DJ's with a greater level of performance creativity.

4 Advanced Connectivity

The turntable features a 24-bit/48 kHz sound card and HID and MIDI control compatibility via USB port. Up to 34 controls on the surface of the player can be used to trigger other devices, such as DJ effectors and software by way of HID and/or MIDI. The HID controls were implemented into the player for superior interfacing with software, faster communication speed over MIDI, audio/visual streaming and two-way information on the display. HID enables easy, precise and native control of DVS systems such as Serato™ Scratch Live, Native Instruments' Traktor series and MixVibes Cross2 without the need for time-coded discs.

5 Slip Mode

When activated, Slip Mode silently continues song playback during a loop, reverse or scratch and continues audible playback at the exact time when the loop, reverse or scratch is ended creating smoother transitions.
